0-0-30

16% Ca

Product 908

For Detailed Application Rates Visit: [www.wommacksfirewoods.com/greenscience](http://www.wommacksfirewoods.com/greenscience)

## GREENS AND TEES APPLICATION

Recommended application rate is 15 lbs. per acre, weekly or bi-weekly depending upon specific operational needs. Heavier applications at a rate of 30 lbs. per acre weekly or bi-weekly depending upon specific operational needs are recommended if water issues are present. Green Science applications should be applied with 30-40 gallons of water per acre. Bi-weekly applications will supply turf with ample Potassium and Calcium.

## FAIRWAYS, ROUGHS, GROW-INS & OVERSEEDING APPLICATION

Average application rates are as follows: Fairways should receive 30 lbs. per acre two to four times yearly, especially during over-seeding and grow-ins. This will supply young seedlings with highly enriched nutrition.

## SPORTSFIELD APPLICATION

Once monthly on professional fields at a 15-30 lbs. per acre will provide a nutrient healthy, strong, and rigid turf with little or no burn potential even in high heat situations.

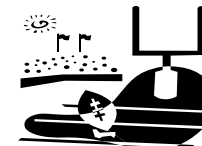

*To achieve optimal results from this product, its use and application rates should be based on soil tests or leaf analysis. For best results and maximum nutrient absorption, water in product directly following application if possible. Calcium and Potassium exceed 20,000 mesh. (CAUTION: This product should be jar tested if using high phosphorus materials. All other nitrogen products are compatible with this product.*

THIS PRODUCT CONTAINS NO WATER OR FILLERS

**NET WT. 15 LBS. (6.8 kg.)**
